

INCREASED COMFORT AND PRODUCTIVITY

Air-Displacement Pipettes

Designed for performance and comfort, PIPETMAN®L offers a comprehensive range of models, adapted to all your needs.

Convenient Use

Lightweight and balanced, PIPETMAN L combines an ergonomic design with minimized pipetting forces, giving you the ability to pipette longer without fatigue.

Right-handed or left-handed? No problem. Adjust the location of the tip ejector to the most comfortable position for you.

Secure Pipetting

Reduce pipetting errors and avoid accidental volume changes during pipetting cycles with a true volume-locking mechanism for improved accuracy and precision.

PIPETMAN L variable volume models are all fully autoclavable without disassembly for maximum convenience and protection from cross-contamination.

Extended Range

Available as a fixed or variable volume, the PIPETMAN L line covers a full volume range from 0.2 µL to 10mL for single-channel models, and from 0.5 µL to 1200µL for multichannel models. Precise, accurate, and reliable, they can be intensively used with confidence in many applications.

Four PIPETMAN L multichannel models (product description ending with VR), covering a volume range from 20 µL to 300 µL, are equipped with V-rings at the bottom of the tip holders for a proper fit with most tip brands.

Choose your Pipette Stand

Different pipette stands and holders allow you to store pipettes vertically, protecting them from contamination.
